

# How to be a part of ReallyWantThat

Getting started with ReallyWantThat is really easy.

First, enter your online shop's homepage into the form (found on <http://reallywantthat.com/info/retailers>) [Fig. 1] and click 'Find Shop'. This will take you to your online shop's section of ReallyWantThat (for example <http://reallywantthat.com/shop/exampleshop.com>).

The screenshot shows a form with the following elements: a link "view all the great features.", a text input field containing "http://www.exampleshop.com/", a "Find Shop" button, a section titled "Add Your Products", and a sub-section titled "Easily add your products to ReallyWantThat by adding the ReallyWantThat".

Fig. 1

Once on your online shop's homepage, click on 'become an admin' (found on the right) [Fig. 2]. This will take you to a page with more information on what you get by becoming an administrator.

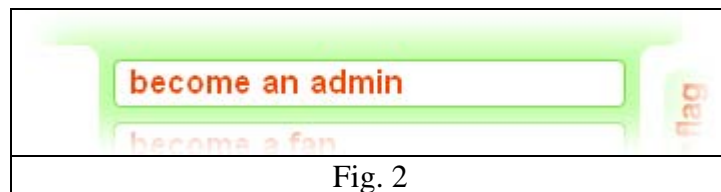

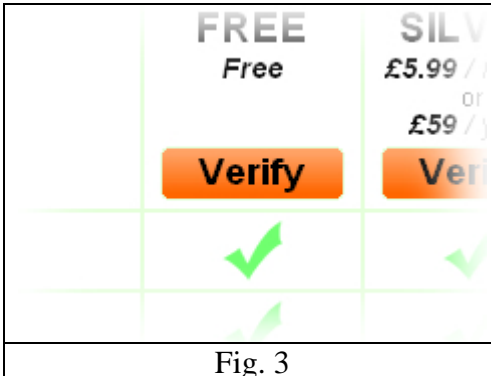

Fig. 2

In order to become an administrator, you must first verify yourself as being a part of the online shop (this is to prevent people claiming they're part of the online shop when they're not). To verify yourself, click on 'Verify' [Fig. 3].

You will be prompted to login / register if you haven't already done so. This won't take long, and once completed, you will be taken to the page where you can verify yourself.

The screenshot shows two verification options: "FREE Free" with a "Verify" button, and "SILV £5.99 / month or £59 / year" with a "Verify" button. Green checkmarks are visible below the buttons.

Fig. 3

There are three ways for you to verify yourself:

## 1) Quick Way

This method requires you to have an email address that uses the same domain as your shop domain. For example, if your online shop is located at <http://www.exampleshop.com/>, then your email address will have to be 'anything@exampleshop.com'.

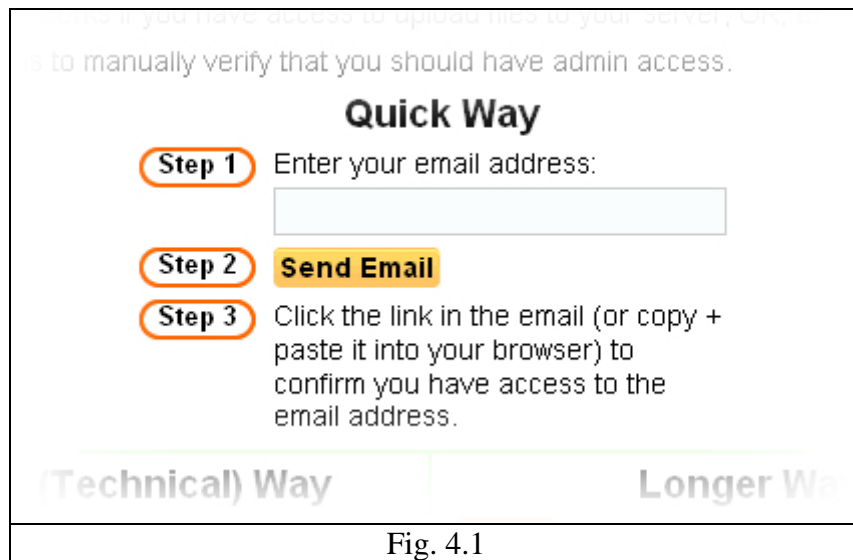

Fig. 4.1

## 2) Quick (Technical) Way

This method requires you to have access to upload files to your server. Simply create a file in Notepad (or similar program) named what we require the name to be, and insert the four necessary characters into the content of the file. Then upload the file to your server. If, for example, your online shop is located at <http://www.exampleshop.com/>, then the file should be viewable at <http://www.exampleshop.com/filename.html>.

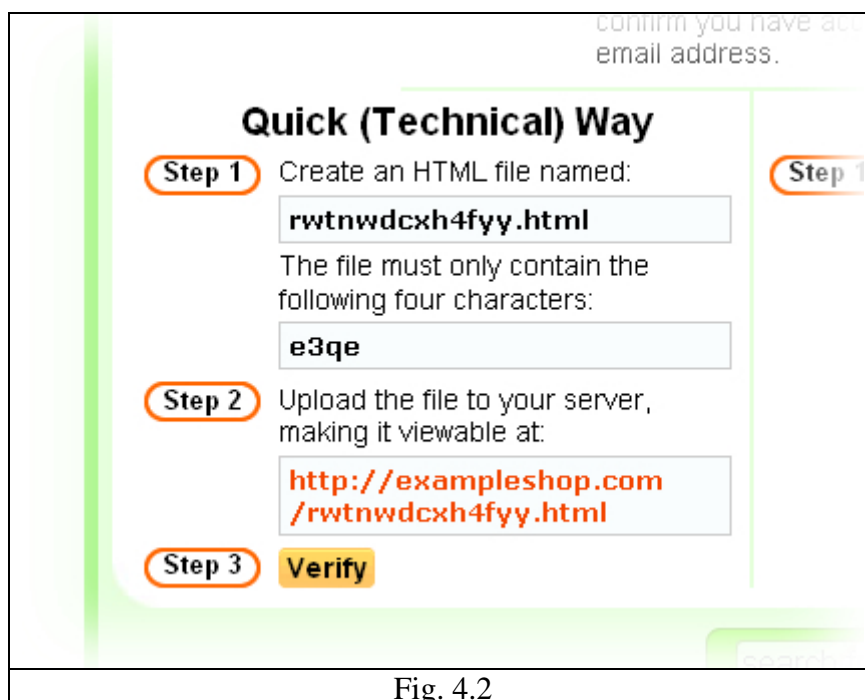

Fig. 4.2

## 3) Longer Way

This method is a non-automated way, so takes longer to complete. To start the process, simply click 'Request Verification', and we will contact the online shop to ensure that your username should have administrative access to their shop's section of ReallyWantThat.

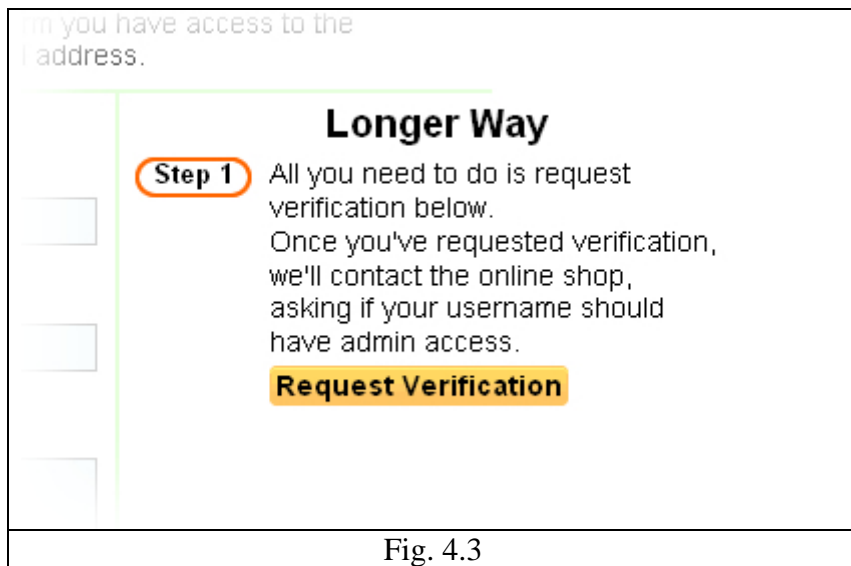

Fig. 4.3

Once verified, you can add your shop logo and description for free, under the ‘Shop Information’ tab of your shop’s administration area.

To get to your administration area, visit your online shop’s section of ReallyWantThat (for example <http://reallywantthat.com/shop/exampleshop.com>) and click on ‘admin area’ [Fig. 5].

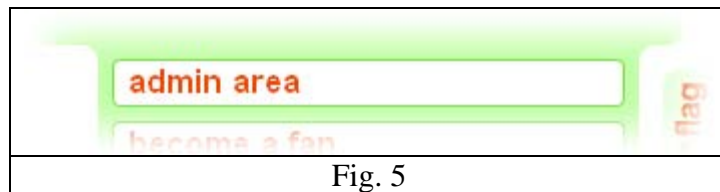

Fig. 5

You can also change the name of your shop (for example from ‘exampleshop.com’ to ‘Example Shop’) by clicking on your shop name when on your shop’s section of ReallyWantThat (for example <http://reallywantthat.com/shop/exampleshop.com>) [Fig. 6].

Fig. 6

Now you can add the ReallyWantThat Shop Button (<http://reallywantthat.com/tools/button>) to your website. This will enable your product data to automatically be added to ReallyWantThat, allowing our users to compare your prices, driving new traffic to your website.

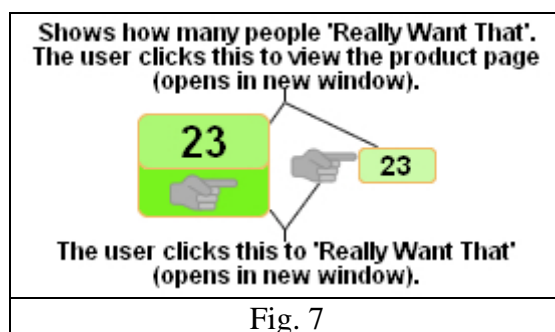

Fig. 7

To add it to your website, enter your settings and click ‘Generate Code’ (if it’s not clickable, then you haven’t entered all the required settings yet). Then add the code to your product pages and it’s done.

It won't make your website slower to load, as it only gets loaded after your content has finished loading, and there are two sizes to choose from, making it very versatile. You can also customise the colours to make it fit in with your site design. [Fig. 8.1 & 8.2].
